and reliable elevator
solutions

Our customers give us
a score of:

9.3

How was Mitsubishi Elevator Europe created? Well, we have to go back to 1951. In that year, the First Veenendaalse Elevator Industry (EVLI) was founded. It began as a manufacturer of construction elevators, but rapidly moved into elevators for people and goods. In 1973, EVLI merged with the elevator department of Wolter & Dros in Amersfoort. In 2001, Mitsubishi acquired 51% of the shares and the name was changed to Mitsubishi Elevator Europe.

1951

Foundation of Mitsubishi Elevator Europe

1921

The start of Mitsubishi Electric Corporation

In 1921, the Mitsubishi Electric Corporation was founded. From that moment, the company focussed on activities in the production, trade and financial service sectors, such as banking and insurance companies. An interesting fact: the name Mitsubishi means 'three diamonds' and these diamonds can also be seen in the company logo. It is a reflection of the three cornerstones of all Mitsubishi companies: quality, reliability and service.

New-build

Looking for an elevator for a new-build project? You can come to us for a huge range of elevators. They could be elevators for people or goods, for example. Or specialised elevators, e.g. fire-fighting or bed elevators. You can also opt for a traction elevator or a hydraulic elevator. Choose the elevator that best suits the needs of the client or users. Looking for a customised elevator? No Problem.

Elevator maintenance

We are here 24 hours a day to help with professional elevator maintenance. The elevator installations that we maintain have an average of just 1 breakdown per year. This compares to almost 3 breakdowns for elevators that are maintained by other companies.

Elevator renovation

Is your elevator old or not up to the job any more? Thanks to our experience and expertise, we can breathe new life into your old elevator. We do this by modernising or replacing it. As a result, you benefit from lower energy and maintenance costs and fewer breakdowns.

M-USE[®]

from ownership to usage

With M-Use[®], it's no longer necessary to own the elevator. For a fixed amount per month, you get a top quality elevator. You set the level of investment and elevator maintenance and we organise the rest. So no unpleasant surprises.

Mitsubishi Elevator Europe **Duurzaamheid** — voor de toekomst —

Our approach

Our aim is to offer our customers and end users the best and most sustainable elevator solutions. This may include our M-Use® elevator, which prioritises reuse and recycling. M-Use® was developed as a result of the increasing demand for a circular economy. Alongside the development of energy-efficient products, we also want to produce our goods as carefully as possible. For example by buying green energy and raising awareness about sustainability among our personnel. We also pay particular attention to environmental performance within our operations. Entirely in line with the ISO 140011 environmental standard. So future generations can also live in the world that we now know.

What are our aims?

The first step that we take is the recycling or reuse all of the components from M-Use® elevators. On top of this, we are keen to provide products and services that contribute towards the 3 Rs (reduce, recycle, reuse) over the entire life cycle of the product. And finally, we also want to lower the carbon emissions of our products. We already reduced these emissions from 1,252 tons in 2011 to 848 tons in 2017. But we'd love to do even better. Our objective for 2021 is 757 tons. This means that we have will have reduced our carbon emissions by 40% compared to 2011. This is one of the ways that we are doing our bit for the circular economy and a better climate.

EMISSIONS

We have reduced the CO2 emissions from our production by 30%.

CO2

Reduction of CO2 emissions from our electricity production.

REUSE

Our M-Use® elevators have a materials passport that helps with the reuse of materials.

COOPERATION

Together with other companies, we are boosting the circular economy. For example, by participating in the World Economic Forum in Davos.

RECYCLING

Recycling materials and elevator parts.

SEAL OF APPROVAL

We pay particular attention to environmental performance within our business operations and comply with the ISO 14001 environmental standard.

With over 65 years of experience, Mitsubishi Elevator Europe is the leading authority when it comes to top-quality, reliable elevator and escalator installations, elevator maintenance and renovations.
